Insurance Assistant Input Values

Sample input values for an insurance assistant chatbot that handles customer queries abt

user_age

45

Family

Married with 2 children (ages 12 and 15), spouse age 42. Looking for comprehensive family coverage including regular check-ups and specialist visits.

insurance_details

I would like to know what health insurance plans are available for my family. We need coverage that includes regular doctor visits, specialist consultations, and good prescription drug coverage. Also interested in dental and vision coverage options.

Input Sets Run Flow (R+R)

replay_query: "Hello! I'm Jessica, your insurance assistant. Based on the data provided, I can see information about a 28-year-old with a Basic Health Plan. However, for your family of four (you at 28, spouse at 42, and children ages 10 and 14), I'd recommend looking at the Family Health Plus Plan or Comprehensive Health & Wellness Plan options available in our system. The Family Health Plus Plan includes semi-private room hospitalization, family doctor visits (up to 10/year/member), specialist consultations (15/year), diagnostics and lab tests (in-patient and out-patient), emergency care and transport (up to \$1,000), and prescription drugs (up to \$500/member). The Comprehensive Health & Wellness Plan offers all Family Health Plus benefits plus preventive care services, mental health support (up to 6 sessions/year/member), wellness programs, additional specialist coverage, and higher prescription drug coverage (up to \$1,000/year/member). For the 28-year-old policy details: Age: 28, Plan: Basic Health Plan, Policy: 2024-03-10 to 2025-03-09, Features: In-Patient Hospitalization (shared room), Emergency Room Services, Basic Diagnostic Services (during in-patient), Prescriptions for Emergencies (up to \$250 annually)."
